

**F O R M E D BY BENKEN, WILSON, AND CO.,** Bridge-street Chambers.

1. Now on the road, travelling south.  
1600 BULLOCKS, 7 years to 6,

2. Various lots of CATTLE, on Queensland stations.

**BURKWEILER and TREBORN** are sorry for SALE  
**HIGH STORE HILL LOCKS,**

From Mr. T. E. Lane's well known stall, comprised (late Clark & Co.) the following:-  
There are three superior Durham cattle, 2½ to 5 years old (chiefly 3 & 4), all highly bred, good colors, and in excellent condition.  
The remainder particulars may be obtained at the Royal Exchange, Sydney.

**F O R P R I V A T E S A L E.**

**LIMBIT STATION,  
DISTRICT OF WIDE BAY AND BURNETT,  
QUEENSLAND,  
WITH 3000 CATTLE (more or less)  
20 HEAD HORSES,  
28 BULLS.**

Limbit Station, formerly the property of Messrs. G. and P. Taylor, is within the same district, and includes the runs formerly called Buaya Creek and Bluff Plains, now consolidated and called Limbit. It also includes the run called Condangan.  
The estimated area of Limbit is:- Leased portion, 34 square miles; resumed portion 34 square miles; and the area of Condangan, 26 square miles. The whole forms an excellent well-grassed estate, which is capable of carrying all its enclosed land about 6000 head of cattle.  
It is abundantly watered by the Mary River, Condangan Bay, Yabber, Bella, and Bluff Creeks.  
There are at present upon the above lot of cattle on the run (in good condition); 400 of these are heifers, now in the better period, which is explicable of carrying; at all times double that number. There are on Condangan carrying all its enclosed land about 6000 head of cattle. From the other cattle and placed there to fatten; also, drafty yards etc.  
The run is also about 30 horses and 25 well-bred bulls on the run.  
The cattle are sound and healthy, and perfectly free from phlegm.  
The IMPROVEMENTS consist of an excellent OUT-AGE, large STORE, COACH-HOUSE, STABLE, and all other requisite conveniences and buildings. In the vicinity of the house there are very large and well-watered paddocks.  
The purchased land consists of 774 acres, selected under pre-emptive right.  
This property is for bona-fide sale, to close partnership account.  
Intending purchasers are therefore invited to make an early inspection.  
Further particulars can be obtained on application to the owners,  
**ELWORTHY and MILLER,  
Mary-street, Gympie.**

**F O R P R I V A T E S A L E,** the following Properties:-  
Crystal Brook Station, Maranoon, 10,000 sheep  
Cattle Station, Leichhardt District, 1450 head cattle  
Fondallina Station, Darling Downs District, 9700 sheep  
Small Farming Station, Darling Downs District, lightly stocked  
Sheep Station, Liverpool Plains, about 20,000 sheep  
Freehold Estate, near Broadwood, 6000 acres highly improved  
Numerous other Properties both in New South Wales and Queensland.

Also the following Stock:-  
Three splendid thoroughbred Stallions  
400 Bullocks, 30 cows, Richmond River  
100 Cows, Liverpool Plains  
100 Store Cattle, Jervoyd  
Store Sheep and Cattle, in Queensland, various lots  
1400 Maiden ewes, 2300 Wethers, near Denison Town  
1000 Head of 100 head of bullocks, which have been separated from the other cattle and placed there to fatten; also, drafty yards etc.  
First-class Bulls, in various localities.

G. N. CRIPPS, 271, George-street.

**P I K E'S CREEK STATION,  
UNSETTLED DISTRICT,  
DARLING DOWNS, QUEENSLAND.**

The undersigned has received instructions from Robert Lawrie Esq., to dispose, privately, of the above first-class property, with about  
16,000 heavily woolled sheep  
100 cattle, milking herd  
Horses, swine, plant, &c.  
This valuable property is most highly situated, beyond the bounds of selection, and embraces a large extent of high land, about 1000 head of bullocks, which have been separated from the other cattle and placed there to fatten; also, drafty yards etc.  
For full particulars apply to  
**G. N. CRIPPS,

## LATEST INTELLIGENCE.

REUTERS' TELEGRAMS.

TO AUSTRALIAN ASSOCIATED PRESS.

FRANCE.

LONDON, MARCH 12.

The new French Ministry is formed:—M. Buffet, Minister of the Interior; M. Dufaure, Minister of Justice; M. Say, Finance Minister; M. Waldeck, Minister of Public Instruction; M. Meaux, Minister for Commerce. The other offices are unchanged.

GERMANY.

LONDON, MARCH 12.

The Emperor William is ill.

[AUSTRALIAN ASSOCIATED PRESS TELEGRAMS.]

NEWCASTLE.

W. Tracey, the railway guard who was injured on Monday, died in the hospital this morning.

WEST MAITLAND.

The Maitland races are not to be postponed. The general entries will close on Tuesday next at 4 o'clock. The course is in splendid order, and a large meeting is anticipated.

BRISBANE.

Telegrams from Townsville and Bowen, dated the 10th instant, have been received to-day. They held out no hopes of the recovery of the occupants of the missing boats of the Gothenburg. The diver, when below getting the gold, saw the bodies of two females from the hatchway of the cabin, but he failed to approach them for the want of sufficient air-tubing. He caught two sharks: in the stomach of one were human skull and some bones; in the stomach of the other he found a human arm and leg.

The Agricultural Show will take place on the 23rd and 24th instants.

The survivors from the wreck of the Gothenburg landed at Bowen, and all of them except three left thence direct for Sydney per Victoria (s), last Tuesday. One is engaged on the Pilot Station, one sick in the hospital, and one discharged. All of them have free passages to Melbourne.

The crew of the Bunyip found \$250 in a box on a corpse which was floating near the wreck of the Gothenburg. The body was too decomposed to identify it. The money has been handed to the Collector of Customs.

At Rockhampton the Fitzroy River has fallen to the level of spring tide. Splendid rains have fallen on the banks.

The Royal Duke, from Sydney, has arrived at Newcastle, damaged, and the shipmen of one of the three dories found it necessary to return to port.

A guarantee fund of £1000 has been subscribed to secure the performance for a season of twenty-six nights of Pompeii's opera troupe.

The official Surveyor-General has been amalgamated. The duties will be performed by Mr. Tully, Under-Secretary for Lands. Mr. Gregory, formerly Surveyor-General, has been appointed Geological Surveyor at the same salary.

The tin ore received at Warwick during the week amounts to 78 tons.

The shipment of ingot tin to London last year amounted to 1210 tons, and the shipments of ore to 20 tons. The shipments of ore to Sydney amount to 3070 tons.

Mr. Maclester, Premier, has been installed as Provincial Grand Master of the Freemasons, Scotch Rite, at Sydney.

Treasure-waiter, on the Marano, with 1200 head of cattle, was sold at \$2.75 per head, by Mr. Morehead to Mr. John Robertson. Same firm sold 600 mixed cattle, at \$1.10.

Mr. Wonga Wonga (s), from Sydney; H.M.S. Blanche, from New Caledonia.

THE HON. J. F. BURN, Postmaster-General of New South Wales, has made an agreement with the Postmaster-General of Victoria, subject to ratification by the two Governments, respecting the mail service. They propose to make the Star and the San Francisco services alternate as early as possible. Victoria will give facility in her power for the rapid transmission of the Star mails from Melbourne to Sydney, and the San Francisco mails from Sydney to Melbourne by Sydney. The Postmaster has further agreed to establish a telegraphic money order system between the two colonies; and to approve of a scheme for running the Star and the San Francisco services alternate as early as possible. Victoria will give facility in her power for the rapid transmission of the Star mails from Melbourne to Sydney, and the San Francisco mails from Sydney to Melbourne by Sydney. The Postmaster has further agreed to establish a telegraphic money order system between the two colonies; and to approve of a scheme for running the Star and the San Francisco services alternate as early as possible.

Several hundred pounds have been collected for the Gothenburg Relief Fund.

About thirty New South Welshmen and Victorians dined together at Scott's on Thursday evening. Mr. Jennings was chairman. Speeches were delivered by the Hon. E. Hughes and Messrs. Farrow, Hay, Abbott, and Smith, members of the New South Wales Parliament.

At the cricket match, Ballarat v. Tasmania, the latter team made 97 runs, and the former 188. The Tasmanians made 97. The Ballarat team commenced their second innings, and lost two wickets for 19 runs.

There has been a large sale of spruce deals at 41d. to 43d., and 12. 6d. boards have sold at 3s. 3d. to 3s. 6d. 5000 cases of kerosene (Devon's) have been sold at 1s. 2d.; Diamond, 1s. 1d. Hay holders are very high.

Arrived—City of Adelaide (s), from Sydney.

Sailed—You Yang (s), for Sydney.

QUEENSLAND.

ARRIVED—Ben Nevis (brig), (schooner), Trinacria (brig), (schooner), (schooner), from Newcastle; at 7, City of Adelaide (s), from Sydney.

SAILED—At 7.30, You Yang (s), for Sydney.

ADELAIDE.

ARRIVED—Ben Nevis (brig), (schooner), Trinacria (brig), (schooner), (schooner), from Newcastle; at 7, City of Adelaide (s), from Sydney.

SAILED—At 7.30, You Yang (s), for Sydney.

WRECK OF THE HELEN MACGREGOR.

(By TELEGRAM.)

THE steamship Helen Macgregor, of 300 tons, commanded by Captain Turner, and which left Sydney on Monday, 9th instants, bound for Grafton, was wrecked to-day. She was on her return voyage for Sydney. On coming out of the Clarence yesterday at 3.45 p.m. she struck the reef on which the steamship Urara was lost. She remained on the reef for an hour when she came off, and quickly went down in mid channel and deep water. Within ten minutes the pilot and steamer's boats saved most of the passengers and crew; but one of the steamer's boats upset. In it were eight persons, including constable Bannan, and they were all of them drowned. Captain Turner and the chief-officer are among the saved. Constable Bannan and O'Brien were on board, in charge of prisoners lately sentenced at the Grafton Sessions.

Immediately on the intelligence being received at Grafton, Mr. Fisher, the Chairman of the Company, accompanied by Mr. Clayton (a director) and the secretary, left for the scene of the disaster in a steam-launch.

The hull of the Helen Macgregor has entirely disappeared.

## NEW SOUTH WALES.

The outgoing mail takes particulars of extraordinary floods, by which a large extent of country along our eastern seaboard has been devastated and numbers have been temporarily driven from their homes. The Government acted with becoming promptness in furnishing relief to the sufferers, many of whom have been left quite destitute. The saddest incident connected with this calamity has been the untimely death of the Hon. W. M. Arnold, Speaker of the Legislative Assembly, who, on the 1st instants, was drowned near his private residence. Mr. Arnold was one of the most able of our public men, and his loss is generally regretted. The cause of misery in one district has been a blessing to others. The pastoral interest, suffering from drought, had come to rejoice that the copious rainfall would further lower it. It has also benefited the city in a salutary point of view.

The necessity of having this colony adequately represented at the forthcoming exhibition at Philadelphia has been brought by a deputation before the Premier. His reply indicated that a sum of \$5000 for that purpose would be asked from Parliament. We have also learned that the Government of Queensland purpose to not in concert with us, and to bear a share of the expenses.

A return cricket match between eleven of Victoria and eleven of Sydney commenced here on the 6th, finished on the 8th, and resulted in a victory for New South Wales with seventy-seven runs to spare. While the match was in progress, the Victorian 8. Lager was run, Melbourne, and was won by Mr. Tait, one of our oldest cricketers.

In mining matters the most interesting item has been the discovery of a rich deposit of quartz at Ophir, where gold was first discovered in Australia. The stone is thickly impregnated with the precious metal.

Railway extension progresses vigorously under existing contracts, and trial surveys are going on in other directions. Steamship efforts are also being made to induce the Government to call tenders for the construction of a coal line south, which would tap the immense coal deposits existing in the Illawarra district. This work will probably be carried out at no distant date.

Mr. W. Macleay, of this city, is fitting out, at his own expense, an expedition to explore New Guinea for silver.

A letter of the sea freight with hawking details has been received by telegram from Queensland. The mail steamer, Gothenburg, Captain Pearce, while returning from Port Darwin to Adelaide, struck on the Barrier Reef, at full speed, remained fast for some hours, and then slipped off into deep water. There were 35 passengers and a crew of 56. Only 26 were saved. Amongst the lost were Judge Weir of the South Australian Supreme Court and an English merchant, the latter a well-known name in the colony. To-day we learn by telegram that the Helen Macgregor has been lost on the bar at Clarence Heads.

No. 2 Co., 1st REGIMENT, V.R.—On Monday evening last, the 15th annual general meeting of the members of this company was held at the Victoria Barracks. There were present Captain Pearce, the Hon. J. F. Burn, and other members of the company. The report of the committee was read, and the annual report was adopted. The chairman, Mr. J. F. Burn, then presented the annual report of the company, which was adopted. The chairman then presented the annual report of the company, which was adopted. The chairman then presented the annual report of the company, which was adopted.

Lectures to Jewish Working Men.—The 4th lecture of the series (see *the Jewish World*) was given last evening at the Hebrew School, Cambridge, by Joseph Jacobs, of St. John's College, Cambridge, an Australian who studied at the Grammar School here, in the Jewish Infant School, Commercial Street, London. The lecturer introduced the lecturer, Mr. H. Green, who is his nephew. The lecturer was not only a graduate at our English universities, but he was also a member of the English and Jewish communities. He is a man of high character and high ability, and he is a man of high character and high ability.

FATAL ACCIDENT.—A distressing accident, which terminated fatally (the *Hopps Express* says), took place at Newcastle on Tuesday afternoon. A young man, Mr. Kavanagh, a girl of about twenty years of age, and a boy of about ten years of age, were riding on a horse-drawn carriage. The carriage was driven by a man named Kavanagh. The carriage was driven by a man named Kavanagh. The carriage was driven by a man named Kavanagh.

FINANCES OF NEW SOUTH WALES.—Mr. George Alfred Lloyd, who presides over the finances of the colony, has just issued a report on the state of the colony's finances. The report shows that the colony's finances are in a sound and healthy state. The report shows that the colony's finances are in a sound and healthy state. The report shows that the colony's finances are in a sound and healthy state.

THE Temple of Delphi was regarded of old, not by Delphians only but by Greeks in general, as the central navel, the revolving-point, as it were, of the whole earth. Geology is said to be regarded in a similar light, but, unhappily for the outer world, only by the Geologists. Occasional differences from this shrine of Apollo and the Museum of Nature, even in surrounding Victorian regions, with tanning and words and irrelevant titles. We confess with regret that the fact of the Temple of Delphi has moved us to the like unseemly laughter. It appears by the *Evening Times* that a Mr. Rutherford, of whom we know no more than that he belongs to that favoured locality, and works the salmon fishery, has been to New Norfolk, visited the salmon ponds, and discovered to his own satisfaction and to the popular delight of the town, that the brown trout (the popular name for *Salmo fario*) at those ponds—the stock from which the Plenty and the Derwent only, but a hundred other streams in Tasmania, New Zealand, and Victoria have been supplied with an unquestioned breed of the true English brown trout—are no brown trout at all, but bull trout! He not only knows the fact, but the *ova* whence these fish were originally bred came from two well-known English streams unvisited by bull trout, and that the produce of the two factually reproduced the characteristics of the two local varieties—this might have been more carefully noted, but he also forgot that these fish and their offspring are as a matter of fact distinctly non-migratory; that the fry do not, like the fry of the sea-trout in the adjacent pond, put on the migratory dress, which the grey-fish smelt, the young of the bull trout, always does; and that the adult fish thrive wonderfully in various waters, and are not at all tempted to descend to the sea.

Mr. Rutherford's story of the Tasmanian fish, the reasons by which he supports it are more ridiculous still. They are simply three. He could not catch the fish with the fly. He caught a large, and no doubt a hungry, one while in fish, not in fly. He caught a large, and no doubt a hungry, one while in fish, not in fly. He caught a large, and no doubt a hungry, one while in fish, not in fly.

"Would it surprise you," Mr. Rutherford says, "that the bull trout takes the fly with very freely? As for the Tasmanian trout not taking the fly, we use no other lure, and have taken many a good dish of trout therewith in Tasmanian streams, including the Plenty, the Derwent, the Laichan, the Styx, and a nameless brook, and the 'Bass' Falls River, all in the neighbourhood of the Salmon Ponds. It appears they do not know anything about fly fishing."

## ODDS AND ENDS.

So the Sydney cricketers have scored the return match. We not only rejoice at this result, but feel that we can do so with clear consciences. Bragg (or "blowing," since Mr. A. Trollope patronises the word) is always odious; but apart from this there are successes in which luck so palpably predominates that the victors ought almost to regret their own victory. But after watching the play on both sides most carefully, we can confidently affirm that the success of our team was not a *duce*, nor the sum of a series of flukes. Individual cases of special good or bad fortune occurred on both sides, but on the whole the match was won fairly on the merits. The fielding on both sides was quite first-rate, and he would be a cold man who ventured to pronounce either party superior in this department. The Melbourne batting was not inferior, perhaps on the average very slightly superior to ours, though there was no exhibition of cricket equal to E. Gregory's first and Evans' second innings. But in plain truth the Sydney bowling was too much for them. Spofforth and Faithfull were above the usual mark of intercolonial bowling, but Coates, in the first Victorian innings, and Evans in the second, showed better bowling than we have ever yet seen in one of these matches. The latter, especially, proved himself too strong for the very best of the Victorian bats, getting six wickets—four of them, Campbell, Hastings, Blackham, and Doyle being clean bowled with the loss of only twenty-six runs. We understand that Coates, no mean judge of such questions, compared Evans' bowling to Southerton's. For ourselves, we were rather reminded by it of a "light of other days." Wisden. There was the same variety, the same steady pitch, the same puzzling variety of break. It was good as the Sydney bowling all round, that it seems almost impossible to particularise. Spofforth and Faithfull, who took the fewest wickets, gave on the other hand the rarest chances of score. Taking the two Sydney bowlers together, we need seek no other proof of their excellence than the small number of runs scored by the batsmen. The first eleven first-class batsmen in either innings got beyond a poor eighteen. The match, as looking at the prospects of New South Wales cricket, was two subjects on which we must say a word of congratulation. The first is the admirable condition of the Albert Ground; a condition due not to natural advantages, but to intelligent, persistent work. The second, and even more interesting, is the fact that a proportion of the strength of our eleven lies in using native talent. For instance, Evans, Faithfull, Powell, Spofforth, and E. Gregory are all genuine Australians. Nothing can better counteract the enervating effects of our Neapolitan climate than the energetic pursuit by our rising generation of manly and athletic sports.

The *Lancet* for November 31st, 1874, is very interesting. It contains a chapter on "Diphtheria," the evidence of a diphtheria epidemic, and a chapter on "Diphtheria," the evidence of a diphtheria epidemic, and a chapter on "Diphtheria," the evidence of a diphtheria epidemic.

**ON MONDAY NEXT.**

**NEW ENGLAND DISTRICT.**

For Imperative Sale.  
By order of the Mortgagees.

That well-known highly improved station  
WINTERBOURNE,  
situated within a few miles of Walsley, and about 120  
miles from the RAILWAY TERMINUS at NEW-  
BURUNDI.  
Terms liberal.

**RICHARDSON AND WRENCH** have re-  
ceived instructions from the MORTGAGEES  
to sell by public auction, at the Rooms, Pitt-street, Sydney,  
on MONDAY, the 16th MARCH,  
The above compact and highly improved property,  
situated at WINTERBOURNE, is a large area of healthy  
country, equal to carrying 20,000 head of cattle as well as at  
least 14,000 sheep, being principally extensive dairy  
and sound ridges, and is well watered by a flowing country  
stream. The water supply is amply distributed all over the run and  
is never failing.

THE HOMESTEAD IMPROVEMENTS, which are  
erected on

**528 ACRES OF FURCHUELL LAND.**  
They are admitted to be amongst the best in New England.  
They include a stone-built residence, containing 10  
rooms, with  
stores and harness-room; large warehouse, fitted with gun-  
wood stores, stables, blacksmith's shop, fitted complete  
with tools, and a large horse and cattle and colts and  
paddock. There are also seven large paddocks, viz. by  
large paddock, enclosed by two-rail fence of 12 miles; by  
sheep paddock, by 5 miles of foot fence; and five others in  
shrub, enclosed by chain-link fence. Five miles  
from head station are erected substantial yards, equal to  
work 1500 head of cattle at a time, with branding and dipping  
pens, and built and yards. There are also many out-buildings

WITH WINTERBOURNE will be sold  
 1100 cattle, more or less,  
 To be unanured and shorn and the right of brand to  
 be given to the purchaser, and  
 3100 SHEEP, MORE OR LESS,  
 of which the following is a description and which will be  
 included in the sale at a fixed price per head, viz.:—  
 Ewes ..... 2450, 24 years and aged  
 Wethers ..... 1600, 24 ditto ditto  
 Ewes (the mixed) ..... 160, 6 months old  
 Wethers ..... 1000, 6 months old.  
 Total ..... 6150, more or less.  
 \* \* \* \* \*  
 " \* \* Stores, working stock, and other belongings to be  
 taken by the purchaser by valuation in the usual way.  
 Q. The sale of the above property affords a good opportunity  
 for the purchaser to acquire a large and compact well-  
 improved station, which with good management, cannot fail  
 to turn out a profitable investment, while its very healthy  
 climate, and the many improvements at the hand stables,  
 make it a desirable residence for any gentleman  
 interested in pastoral pursuits lying in the midland  
 country.

**RYDE, PARANATTA RIVER.**
